Picture Production and Bitmap Conversion for GDEM102F91

1. Make Picture

This screen supports four colors, black, white, red and yellow are all standard colors. In practice, you can refer to the color chart of the Windows system's built-in drawing software. When creating images, you need to make a 960*640 resolution image into a bitmap that only contains four colors: black, white, red, and yellow, and save the images in BMP or jpg format, as shown in Figure 1.

Conception:

1.1. Monochrome: black, white 

1.2. Three colors: black, white, red/yellow 

1.3. Four colors: black, white, red, and yellow 

1.4. Seven colors: black, white, red, yellow, blue, green, orange

2. Bitmap Conversion

Bitmap conversion can be done using image2LCD software, which can be downloaded from the official website (<https://www.good-display.com>) . The interface for setting bitmap conversion parameters is shown in Figure 2:

2.1. Open the image2LCD software and click the "Open" button  , Import the image that needs to be converted;

2.2. Output data type: Select "C array (*.c)"  ;

2.3. Scanning mode: Select "Horizon Scan"  ;

2.4. Output grayscale: Select "4 Gray"  ;

2.5. Maximum width and height: Select "960" and "640", After selection, you need to click the arrow below to confirm  ;

2.6. Do not select any of these five options  ;

2.7. "Reverse Color" not selected  ;

2.8. Click on 'Save'  , Save the converted array to a file with an extension of ".C";

2.9. Finally, replace the corresponding array in the program with the array in the file ".C".
